

# SOLID SURFACE CLEANING GUIDE

progett

## Cleaning your Solid Surface product is easy!

Matt White Solid Surface products require minimal maintenance. Even stains such as hair dye, nail polish and lipstick can be easily removed without a trace.

## Easy Day-To-Day Maintenance

**Cream Cleaner**  
e.g. Jif

**Cleaning Sponges**  
e.g. White Magic

**Water**

**Towels**

- Use a small amount of water with a cleaning sponge (supplied with your Solid Surface product) to remove light marks and scuffs. Stubborn marks can be removed using just a small amount of cream cleaner.
- A very fine sandpaper (e.g. 1000+ grit) can be used with water to remove small scratches. Chips and deep marks can be repaired by filling and sanding using a specialist repair kit.

## Cosmetic Products Easily Removed

**Hair Dye**

**Nail Polish**

**Lipstick**

**Make-up &  
Tanning Products**

View our Solid Surface cleaning & restoration videos on our website to learn how to remove these:

## Do Not Use:

- Scouring sponges
- Corrosives
- Gritty cleaning products
- Acetone
- Paint thinners

These will damage the sheen.
