

BUDDY WALL MOUNT BATH/SHOWER SET | CB030

**IMPORTANT!** 

Please read these instructions **prior** to installation

Distributed by:

# RECOMMENDATIONS FOR INSTALLATION

ATTENTION: Failure to follow these recommendations may void the warranty. It is recommended that a qualified, licensed tradesperson install this product.

#### Water Pressure: 3 bar

Product performance cannot be guaranteed if pressure is less than 1 bar. Above 5 bar a pressure regulator must be installed. Failure to do so voids the product warranty.

Water Temperature: 45°-65°C

#### Stop Taps/Filters

When possible angle valves and/or filters are recommended to prevent impurities and debris

#### Pre-Flush

Always flush out the pipework before connecting any tapware. Failure to do so voids the product warranty.

# **CLEANING & MAINTENANCE**

#### Cleaning

Clean with warm soapy water and a smooth cloth. Avoid abrasive sponges or detergents as these will damage the finish.

To preserve the finish it is recommend to apply a stainless steel oil/mineral oil on a monthly basis.

#### Aerator Maintenance

Remove the aerator, either with a spanner or an aerator cartridge key.

Immerse for half a day in water-vinegar solution (80-20%).

Wash, then reassemble.

#### Cartridge Replacement

Before you start, turn off the water supply to the mixer.

- 1. Remove the handle
- 2. Unscrew the dome (hand tightened)
- 3. Unscrew the locking nut
- 4. Remove the cartridge

Re-assemble in reverse order

Max tightening torque on locking nut: 10-12 Nm

### Warranty Information

For full details about our warranty visit plumbline.co.nz/warranty-information

# **BEFORE WALL LINING**

1 Ensure the framing allows for the internals and wingbacks to be placed in the desired position.

# ▲ IMPORTANT!!

Please also note the diagram on how to set out the shower mixer with the diverter.

2 Fix the internals and wingbacks into place and run the piping between them. We recommend to run the piping as shown in the diagram.

progette

# ▲ IMPORTANT

Prior to wall lining, all fittings must be checked for for leaks.

- Charge the system with mains pressure and plug both of the wingbacks.
- Open the valve and test for leaks while adjusting the diverter to both positions.
- Mains pressure only, max 800 KPA hydrostatic test.

DO NOT HYDROSTATIC TEST WITH MIXER OPEN!

## AFTER WALL LINING

**3** Remove the protective sleeves from the mixer and diverter, then install the externals.

4 Apply thread sealent to the male threads on the sipogts and screw them into the wingbacks.

5 Finally fit off the externals of the spout and handshower.
