# RECOMMENDATIONS FOR INSTALLATION

Water Pressure  
1 - 3 bar

Water Temperature  
45° - 65°C

Stop Taps  
Angle valves are recommended

Pre-Flush  
Always flush out the pipework  
before connecting any tapware.

## ATTENTION

Failure to do so will void  
the warranty.

## Cleaning

Clean with warm soapy water and a smooth cloth. Avoid abrasive sponges or detergents as these will damage the finish.

## Aerator Maintenance

Unscrew the aerator with 22mm spanner

immerse for half a day in water-vinegar solution (80-20%)

Wash, then reassemble

# INSTALLATION INSTRUCTIONS

BASIN MIXER | CON08 - EMP08

1

Screw the threaded rod into the holes at the bottom of the mixer body.

2

Screw the flexible hoses into the water inlet at the bottom of the mixer body

3

Slide the o-ring over the mixer assembly then insert the whole block into the basin hole.

4

While holding the mixer in place, slide in the rubber gasket and the metal washer of the fixing kit. Secondly screw the nut on the threaded rod and fix them using a wrench.

**ATTENTION**

Two operators are required to avoid damages.

5

Insert the rod into the tap body and then connect it to the pop-waste connection.
