1

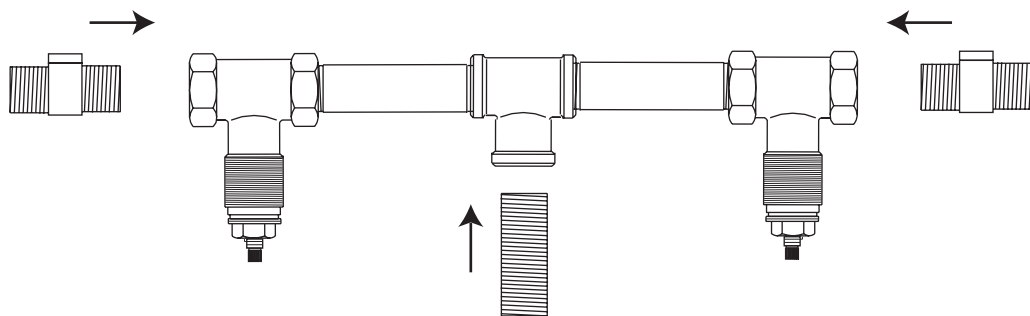

Apply thread sealant to the appropriate threads, then connect up the fittings and hot/cold taps as shown below. Ensure that the cartridge barrels and the water outlet are all parallel with each other.

2

Apply thread sealant to the two lugged nipples then connect them up to the hot and cold taps.

Please note: these lugged nipples are not supplied

3

Using 4x screws to fix the unit through the lugs ensuring it is fastened into sufficient framing and that it is sitting level.
Prior to lining the wall test the mixer to ensure there are no leaks.

4

Once the wall has been lined, fit the mixer off with the externals and test for performance.
