1

Firstly, insert the hot and cold water flexible hoses into the inlets on mixer.

2

Screw the threaded rod into the body of the mixer. Place the mixer down to sit in the taphole, ensure the O-ring is sitting between the bench and base ring of the mixer.

3

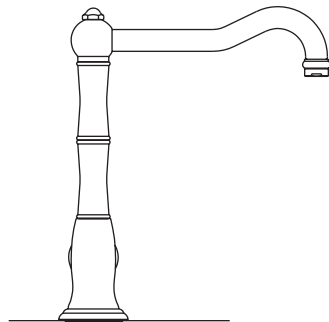

Push the rubber washer then the brass fixing piece up to the underside of the taphole then fasten the mixer in place with the locking nut. For ease of install we recommend using tube spanners.

4

Flush out the pipework then connect the hot and cold flexible hoses to the outlets. We recommend installing stop valves on both the hot and cold water feeds.

Test the mixer for performance.
